

Trigonometry Test : (B)

1)

Calculate q

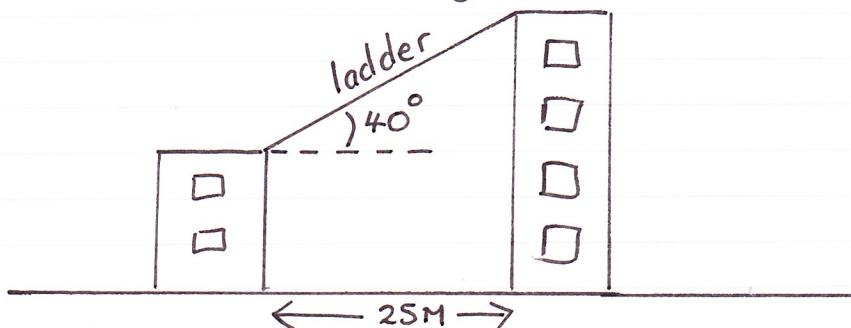

- 2) An aircraft flight path is shown below as it travels between airport A and airport B

- The maximum altitude reached is 8 km

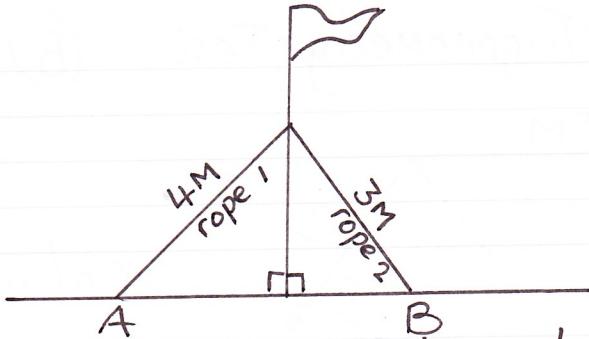

Calculate the total distance travelled by the aircraft

- 3) The diagram shows the situation of a ladder placed between 2 buildings

- The small building is 20M high.
- Calculate the height of the tall building.

4)

The diagram shows a flag pole being supported by 2 taut ropes.

The angle of elevation of rope 1 is 51° .
The angle of elevation of rope 2 is 60° .

Calculate the distance AB
