

## Integration : # : Area under Curves

- 1) Calculate the area bounded between the curve, the  $x$  axis between the  $x$  limits  $x = -1$  and  $x = 2$

- 2) Calculate the area bounded between the curve, the  $x$  axis and the  $x$  limits  $x = -2$  and  $x = 1$

- 3) Calculate the area bounded by the curve  $y = x^3 - 2x^2 - 3x$  the  $x$  axis and  $x$  limits  $x = -1$  and  $x = 3$
